## **DRILLING & COMPLETION**

## **STIMULATION & PRODUCTION**

### **Cement Additives:**

improves cement performance and bonding for better zonal isolation.

### **Casing Accessories:**

ensure the integrity of the well construction and cementing operations.

### **Drilling Chemicals:**

Increase drilling speed, efficient cuttings removal and reduce downtime.

### **Production Chemicals:**

fewer interventions and more production.

### **Drilling Motors:**

vertical and directional motors with Sealed Bearing and Mud Lube configurations.

### **Downhole Drilling Tools:**

full range of drill string components to make drilling more efficient and reduce non-productive time.

### **Stimulation Chemicals:**

increase load recovery, hydrocarbon production, lower pumping friction and increase ROI.

### **Teledrift Measurement While Drilling:**

continuous measurements to surface while drilling, satellite-based remote monitoring and certification for faster and more accurate drilling.

### **Stemulator:**

improve penetration rate by inducing axial vibration in the drill string to reduce friction drag and sticking.

### **Artificial Lift:**

novel pump systems, reliable support to help lower cost, improve reliability and deliver more production.
